About me

I'm a Software Engineer with 10 years of experience in web development, specializing in building scalable, efficient, and intuitive applications. My expertise spans JavaScript, TypeScript, Vue, React, Next.js, and Node.js. I'm always eager to explore new technologies and refine my skills to stay ahead in the ever-evolving tech landscape.

Experience

- 2022–2025 **Senior Software Engineer**, *Trucksters*, Madrid.
Implemented Typescript in all the frontends and added state management system to improve the scalability of the software. I maintained and developed new features for the internal TMS, measuring impact of development using Mixpanel and BigQuery. Used technologies are Vue and Node.js mainly.
- 2022 **Lead Frontend Engineer**, *WizMusic*, Barcelona.
Full responsibility on the frontend side of the product, build with Next.js. Integration with Stripe and web3 wallets. Participated actively in product definition. Worked on SEO and performance optimization. Test implementation using Jest.
- 2019–2022 **Mid Frontend Developer**, *Empathy*, Gijón.
Worked as part of the product development team for the Vue frontend library of the company's search engine. Library was used by top tier e-commerce and other companies such as Kroger, Carrefour, Inditex brands and Vodafone among many others, supporting millions of users per day.
- 2016–2019 **Fullstack Developer**, *Goo Apps*, Gijón.
Consultancy experience working in several projects. Digitalization processes for many top companies such as Vinci Energies. Developed many mobile apps using React Native and React and PHP backoffices. Attended MWC as a Sales Representative for the company.
- 2016 **Fullstack Developer and Sales**, *Betterplace*, Oviedo.
Hybrid job, from development to working as a SDR for the project. Sold the first two software licenses. Technologies used spans Ruby on Rails, React and GIS using PostGIS.

Knowledge Area

Frontend	Vue, React, Next.js, Tailwind, Pinia, Redux, React Native
Backend	Node.js, Typescript, Express, Ruby on Rails
Database	Postgres, MongoDB, Drizzle, Prisma, Supabase, Firebase
